

Lab sheet 16**Submission Due: 16.10.2024****Title:** HR Management System - III**Aims:**

- Implement routes for views
- Implement views

Tasks:

- Update the APIs
- Update controller
- Create blade files

Activities :

1. Update the APIs

```
// For views
Route::get('employee/{id}/edit', [EmployeeController::class,
'edit']);
```

2. Update controller

```
public function edit($id)
{
    $employee = Employee::findOrFail($id);
    return view('employee.edit', compact('employee'));
}

public function update(Request $request, $id)
{
    $employee = Employee::findOrFail($id);
    $employee->update($request->all());
    return redirect('employee')->with('success', 'Employee
updated successfully.');
```

```
public function delete($id)
{
    $employee = Employee::findOrFail($id);
    $employee->delete();
    return redirect('employee')->with('success', 'Employee
deleted successfully.');
```

3. Create blade files
 - I. layout.blade.php
 - II. edit.blade.php

Discussion:

- Passing Data to view
